holographic as in the sense of "made with your own hand"

draw code39 barcodes by hand with this simple template!
find the number you are encoding and connect it top to bottom
wide-narrow ratio is 2.5:1, readers should accept 2:1 to 3:1
dots are 1.5mm wide, perfect for the blunt sharpie on my desk
remember to put a star* at the end of your code or it won't scan
(i put one at the end to copy if you use all nine spaces)
